About Me

Real-world experience. Innovative problem solving. Driven to succeed.

Experience

June 2017 - Present — **Software Engineer**
L3Harris Technologies, FL

- Function as the technical lead for an enterprise custom PLM software solution with 8,000+ active users (written primarily in Java).
- Implement bug fixes, improvements, and new features for a 500,000+ line codebase on a daily basis.
  - This includes both front-end and back-end development.
- Balance supporting multiple teams/projects executing in parallel with 100% of tasks completed on time and within budget.
- Developed multiple RESTful APIs to phase out legacy SOAP web services using a combination of Apache CXF, Jackson, and Spring.
- Secured RESTful APIs with the use of the Spring security framework, JSON Web Tokens (JWT), and Basic Authentication.
- Aided in modernizing developer tool stack.
- Created DevOps pipelines in Jenkins for automating build deployments (written primarily in Groovy).
- Received the following awards/recognitions:
  - URock for Excellence (x3)
  - ThankU for Customer Support
- Completed multiple e3 Just Do It projects in 2020 that save L3Harris an estimated $137,520 annually exceeding goal by 916%.
- Completed multiple e3 Just Do It projects in 2021 that save L3Harris an estimated $51,560 annually exceeding goal by 171%.

May 2016 - Aug 2016 — **Software Engineer (Intern) – Custom Web App Team**
L3Harris Technologies, FL

May 2015 - Aug 2015 — **Software Engineer (Intern) – Agile PLM Team**
L3Harris Technologies, FL
